COMMUNITY SERVICE PROJECT

Introduction

Community Service Project is an experiential learning strategy that integrates meaningful community service with instruction, participation, learning and community development. Community Service Project involves students in community development and service activities and applies the experience to personal and academic development. Community Service Project is meant to link the community with the college for mutual benefit. The community will be benefited with the focused contribution of the college students for the village/ local development. The college finds an opportunity to develop social sensibility and responsibility among students and also emerge as a socially responsible institution. For this above mentioned community service project, I have selected my native place, vinukonda, a small hamlet, is attached to vinukonda, it sits snugly in the midts of forest, surrounded by hills which are stretched to 2 kms of distance it is in the remote pockets of the newly formed Palnadu district. It is situated 40 kms away from mandal headquarters, Vinukonda. Adjacent to our village, vinukonda , one river namely vinukonda flows to it's brim in rainy season. Towards North of the village a big mango archery is developed and it's ready for fruition. Nearer to the village one famous Hindu temple i.e. SIVALAYA temple and MOTH MASZID is present, from that temple the village got name and fame. According to our elders version, the idol of the temple is manifested from the ravines of the nearly hills and they brought it, erected a temple and started deifying it
