Title : Computer literacy
**Aim Of The Project : To Identify The Answers Of The
People On Internet**
**Method Adopted : Community survey and
Community awareness**

Timeline :

First Week: Community survey This Includes door to door survey with the collection of data In the Form of Questionnaire different ages are selected for the collection of data.

Second Week: Under the program an attempt to create awareness regarding the collecting the information about

internet usage on the different age groups has been made by the team members individually and different age groups are addressed separately for this purpose.

Third Week: All the data collected has been completed in the form of a project report. This includes analysis of the data. Based on this definite conclusions are drawn regarding the usage of internet. This includes the graphical representation of the data.

Fourth Week: It includes the presentation of our project work to the internal viva committee at the college level individually.

Tools And Techniques:

Although no specific clinical tools are used in the project. The format listed below are used for collecting data and drawing conclusions.

1. Questionnaire
2. Tabular columns

Observation Made During The Community Survey

1. People are able to searching the information in the internet but someone unable to search the information comes under (poor in computer literacy)

2. Some of them are searching the information in the internet but they can't able to share the information to others (This will be under the category of good)

3. Some of them are searching information but it is relevant or not, useful or not, but the sharing information to the others (comes under the average)

4. Some of them are searching information, sharing to others, find the relevant information and it is very useful to them (comes under the excellence)

Suggestions To Be Given

1. Sharing the information one to another.
2. To suggest how to find the information to enable people.
3. Communicate to the people how to find the relevant information.
4. Usage of the internet.
5. To suggest how to create your own text and digital media.

Discussion And Conclusion

After this community survey the following conclusions are drawn:

1. As a result of this survey 80% of people are using the internet.
2. People say it is very useful to us.
3. People cooperate with us and give the information curiously.
4. By this survey unknown people know the information and are aware about the internet.
5. But this someone knows information but it doesn't share because unable to communicate.
