# Alexander Graham Bell

# Early Life

Alexander Bell was born in March, 1847 in Edinburgh, Scotland.

He had two brothers, Melville James Bell and Edward Charles Bell.

Bell's father, Alexander Melville Bell, was a phonetician, which is a scientist who studies speech sounds and how they are made and transmitted.

His mother was Eliza Grace Bell, and she was an accomplished pianist. Bell was home-schooled by his mother, who tried to give him a sense of curiosity about the world around him.

To his close friends and family, Alexander Bell was known by the nickname Aleck.

# The Telephone

In the early 1870s, Bell was living and teaching in Boston, America. He spent years trying to develop a device to transmit the human voice over electrical wires.

In 1874 he began working with Thomas Watson, a skilled electrician. Together, they continued experimenting and developing a way to transmit speech.

Thomas Watson

Born: 3 March 1847, [Edinburgh, United Kingdom](#)

Died: 2 August 1922, [Beinn Bhreagh](#)

Spouse: [Mabel Gardiner Hubbard](#) (m. 1877–1922)
